MADHESH R

B.Tech in Computer Science and Business Systems
Sri Sairam Engineering College, Chennai
Chennai, Tamil Nadu

Phone: +91-9176370183
Email: madheshr005@gmail.com
GitHub: github.com/madhesh005
LinkedIn: linkedin.com/in/madheshr005
Portfolio: madheshworks.vercel.app

PROFESSIONAL SUMMARY

Final-year B.Tech Computer Science and Business Systems student with hands-on experience in developing full-stack applications, AI-driven solutions, and blockchain-based systems through internships, hackathons, and real-world projects. Strong understanding of software engineering principles, object-oriented programming, database management, and RESTful API development. Passionate about building reliable software, solving real-world engineering challenges, and contributing effectively in collaborative development teams.

EDUCATION

Bachelor of Technology – Computer Science and Business Systems — *Sep 2023 – Present (Expected May 2027)*
Sri Sairam Engineering College, Chennai — *CGPA: 8.50*

Higher Secondary Education (12th, State Board) — *Mar 2023*
Chennai HR Sec School, Velachery, Chennai — *Percentage: 88%*

Secondary School Education (10th, State Board – SSLC) — *Mar 2021*
Chennai HR Sec School, Velachery, Chennai — *Result: Pass*

PROJECTS

ChainVoice – Hybrid Blockchain Infrastructure for Invoice Financing — *Mar 2026 – Apr 2026*

DeltaBuild 2026 Hackathon | HyperLedger Fabric, Node.js, React.js, IPFS, Smart Contracts

- Led team TechTitans to design ChainVoice – a permissioned blockchain system integrating HyperLedger Fabric and IPFS to generate SHA-256 cryptographic invoice fingerprints, enabling real-time cross-lender verification and eliminating duplicate financing fraud for MSMEs.
- Architected a 7-step pipeline (ERP fetch → extraction → normalization → hash generation → smart contract verification → IPFS storage → audit logging) with tamper-evident, immutable audit trails for lenders and regulators.

ScamShield – AI-Powered Money Mule Fraud Detection System — *Feb 2026 – Present*

RBIH NFPC Hackathon (Top 12/500+ Teams) | LightGBM, XGBoost, SHAP, Graph Intelligence, Python

- Engineered a multi-layer fraud detection pipeline processing **400M+ transactions** with 164 engineered features, integrating graph intelligence, **FLSM Engine** (Fraud Lifecycle State Machine tracking. DORMANT → WARMING → BURST → EXPLOIT → EXIT transitions), and Temporal IoU for short-window mule detection – achieving **AUC-ROC: 0.9424**.
- Built an explainable ensemble ML system (**LightGBM + XGBoost + SHAP**) with a 7-category RH Defense taxonomy to minimize false positives, enabling real-time, regulatory-compliant fraud decisions aligned with **AI-driven human + machine delivery** for large-scale financial systems.

PUBLICATIONS

CBlock - Cryptographic Binding and Cross Ledger Duplication Detection System for Carbon Credits — *May 2026*

Indian Patent (Published) | Publication No: 19/2026 | Application No: 202641025556

- Co-inventor of a patented system enabling geo-temporal cryptographic binding and cross-ledger duplication detection for carbon credits, forming the core innovation behind **CBlock**, a blockchain-powered carbon credit marketplace.
- Designed to eliminate double-counting and fraud in carbon credit issuance through tamper-proof, location-and-time-bound verification across distributed ledgers.

INTERNSHIP EXPERIENCE

SprintXplore Infotech Private Limited, Chennai — *Jan 2026 – Apr 2026*

Software Development Intern

- Engineered **DeFiScore** for **Coeffx Technologies** – a privacy-preserving credit scoring protocol to evaluate wallet creditworthiness from behavioral data without exposing raw transaction details, enabling undercollateralized DeFi lending.
- Built an AI-powered lead conversion model using **XGBoost and SHAP**, surfacing the top five conversion drivers and improving sales team decision accuracy through explainable ML insights.

Wealth Empires – Tax & Compliance Advisory, Remote — *Sep 2025 – Oct 2025*

Web Development Intern

- Designed and deployed the company website end-to-end within six weeks, integrating compliance service modules and delivering a seamless user experience across devices while improving Core Web Vitals.

SKILLS & CERTIFICATIONS

Languages	Java, Python, JavaScript
AI/ML & GenAI	Data Mining, Generative AI, XGBoost, LightGBM, SHAP, NumPy, Pandas
Web	React.js, Node.js, Express.js, REST API Development
Blockchain	HyperLedger Fabric, Pinata IPFS, Smart Contracts
CS Fundamentals	Data Structures & Algorithms, OOP, DBMS
Tools & Database	GitHub, Figma, MySql, Firebase
Certifications	Udemy Full-Stack Web Developer, Infosys Springboard: Intro to AI & Deep Learning, NPTEL: Java & DBMS, IEEE BLP: Introduction to Blockchain

AWARDS & ACHIEVEMENTS

Hackathon Winner – Sai Hackfest 2025, DeltaBuild 2026, SDG Ideathon
Hackathon Finalist – Reserve Bank Innovation Hub NFPC Hackathon 2026, Hack the Horizon 2.0
IEEE Reliability Society Sairam Chapter – MasterMind *(2025–Present)* – Co-organized SustainTech 2026, a Two-day Technical Bootcamp for students across the chapter, and Co-organized Intellect Hack 2026, a 6-Hours Hackathon with around 60 teams participation.
IEEE TEMS Society – Website & Event Member *(2024–2025)* – Maintained and managed the IEEE TEMS official website and volunteered in organizing various chapter events and activities.
